

CORONER FINDS ARSENIC

Mrs. Louise Lindloff.

Another link was forged in the chain of circumstantial evidence connecting Mrs. Louise Lindloff with the mysterious death of two of her husbands and three children, when Prof. Haynes of Rush Medical college, who has been analyzing the organs of her second husband, William Lindloff, and her daughter, Anna, reported to Coroner Hoffman this afternoon that he had found arsenic in both bodies.

With this report, and also the report of Prof. Haynes on the body of Alfred Graunke, the youngest son, who died two weeks ago, that arsenic in large quantities to cause death had been found, it is expected that at the inquest, which will be held in a few days, the woman will be ordered held to the grand jury.

MRS. VERMILYA FREED

Mrs. Louise Vermilya, suspected of poisoning several persons, and tried once on the charge of poisoning William Smith, her sweetheart, and a boarder at her home, was released today on \$5,000 bail.

The jury in the first trial disagreed, and a new trial will be held within ten days. Mrs. Vermilya will go to Michigan to recuperate.

At the same moment that Mrs. Vermilya left the jail, Coroner Hoffman was preparing to ask the indictment of Louise Lindloff, also suspected of being a wholesale poisoner. There is a remarkable analogy between the two cases.

BOATS COLLIDE

Calais, Maine, June 27.—One man drowned, 700 passengers taken from excursion steamer Grand Manan early today, when the ship's hull was ripped in collision with the tugboat York in the St. Croix river.

The captain of the tug, James Carey, of Boston, who was in his cabin when the boats crashed, went down with his ship.

WEATHER FORECAST

Real Summer.—Fair tonight and probably Friday Chicago and vicinity; rising temperature Friday; moderate northeast shifting to southeast winds.
